Health Guarantee

Thank you for purchasing a dog from Heartland English Setters. Your dog is guaranteed to pass its OFA hip exam (score fair, good, or excellent), at two years of age. Your dog is also guaranteed to the age of 27 months against any serious genetic or congenital defects that will seriously hinder the usefulness of the dog for hunting purposes. If your dog experiences a serious disorder or defect, you must have your veterinarian notify Heartland English Setters on personally signed Letterhead. You will receive credit on a future puppy of similar breeding, upon proof of neutering or spaying. You may redeem your puppy credit at any time in the future by placing your name on the puppy reservation list.

To qualify for the guarantee, the dog must be in the possession of its original owner, must not exhibit related disorders caused by human induced trauma or accident, and must not have been bred before two years of age.

Every dog leaving our kennel is carefully examined to be as reasonably free of parasites, fungus, and infectious disease as possible. We have provided your dog with the best possible food products and lots of tender loving care while under our control. Helping your dog achieve his full potential as a healthy, first class field dog and family companion is your responsibility from this point.

It is imperative that your dog continue to receive routine parasite control and vaccinations. We strongly encourage a veterinary examination within 72 hours of purchase.
